

Internal Seminar

Development of Organic Synthetic Methods for N-Arylation and for Synthesis of Chiral Propargylamines and Chiral Allenes

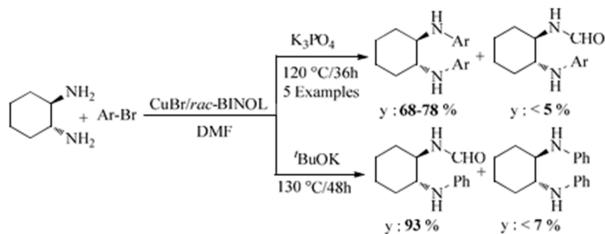

Laxman M. Alakonda

UoH, Hyderabad

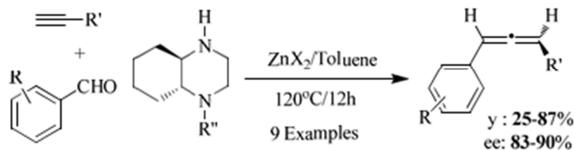

- Simple and convenient methods for N-arylation of NH-heterocycles and diphenylamine¹

- Copper (I) catalysis: Synthesis of N,N'-diarylated and N-phenylation and N'-formylation of chiral C2 symmetric diamines²

- Zinc Salt Promoted Diastereoselective Synthesis of Chiral Propargylamines Using Chiral Piperazines and Their Enantioselective Conversion into Chiral Allenes³
