

# **Seminar**

**What's common in your skin and gut?**

**Mahendra Sonawane**

**Tata Institute of Fundamental  
Research, Mumbai**

In most of the epithelial tissues, the apical domain of the cells is folded into actin-based projections such as microvilli, stereocilia and microridges. These apical projections are essential for imparting functionality to the epithelium. I will discuss our recent findings, which reveal how apical projections are formed and maintained in the epidermis and intestine.

***Friday, Oct 14<sup>th</sup> 2016***

***11:30 AM (Tea/Coffee at 11:15 AM)***

***Seminar Hall, TCIS***
