Laboratory Automation System

Naresh Kumar

TIFR, Hyderabad

Laboratories today face increasing pressure to automate their operations as they are challenged by a continuing increase in workload, need to reduce expenditure, laboratory errors, and difficulties in recruitment of experienced technical staff. Every laboratory have some common and some different requirements, and a small parameter can make off the self-control system useless. I am presenting 'Laboratory Automation System' which I designed and its application in Dr. K.V. Raman's Lab.

Monday, Oct 29th 2018

2:30 PM (Tea/Coffee at 2:00 PM)

Seminar Hall, TIFR-H
