

SHAPES AND GEOMETRY OF SURFACES

Almost all the objects that we see in our world are examples of surfaces. We will discuss a method of classifying this multitude of shapes that dates back to the 19th century. This is the basis for understanding the rules of geometry hosted on a surface.

Venue - Lamakaan, off Road No. 1, Banjara Hills, near GVK One Mall

Date - July 16, 2016, 2 PM

Prof. Mahan Mj teaches Mathematics at TIFR, Mumbai. In 2015, he won the Infosys Prize in Mathematics for his work in geometric group theory, low- dimension topology, and complex geometry.
