Conversations on Science

Nano: the big push to make it small

The emergence of the nanoscale in materials and devices will have a profound impact on the technologies of the future. We'll talk about exploring and assembling nanostructures, their remarkable properties, and the challenges involved in integrating them into real-world applications.

Discussion leader: PM Ajayan is Professor of Materials Science and Nano-Engineering at Rice University in Texas. His research is at the forefront of developing materials such as carbon nanotubes, nanocomposites, graphene and other 2D materials

Sawaal-Jawaab is a series of conversations about current issues in science. The discussion will be initiated and led by a prominent scientist. Open to all ages and backgrounds. Come with your curiosity and questions.

June 6th 2015 2 PM
