Conversations on Science

After the Higgs

The discovery of the elusive Higgs particle led to the Physics Nobel Prize for 2013. How did this discovery affect our understanding of the interactions of the elementary building blocks of nature? Does it shed light on other cosmic mysteries such as dark energy and dark matter?

Rohini Godbole is a theoretical particle physicist. She is a Professor at the Centre for High Energy Physics, IISc, Bangalore. She was present at the announcement of the Higgs discovery .

Sawaal-Jawaab is a series of conversations about current issues in science. The discussion will be initiated and led by a prominent scientist. Open to all ages and backgrounds. Come with your curiosity and questions.
