Conversations on Science

Lord of the Rings: The Rise of Carbon

Civilizations are defined by the materials they use: stone, bronze, iron, silicon. Carbon is now back in its element! Carbon-based materials assemble in complex building blocks like rings, cages, tubes and sheets. With form comes novel function: strong fibres salvaged from soot, flexible electronics ripped off your pencil tip, and a futuristic landscape of other such marvels.

Discussion leader: Chemist V. Chandrasekhar, is an expert at creating molecules with metal atoms encased in intricate organic scaffolds. He is Dean and Senior Professor at TCIS Hyderabad.

Sawaal-Jawaab is a series of conversations about current issues in science. The discussion will be initiated and led by a prominent scientist. Open to all ages and backgrounds. Come with your curiosity and questions.
