

Colloquium

Bose Statistics

Mustansir Barma

TIFR, Hyderabad

In 1924, Satyendra Nath Bose published a paper which introduced a new concept into physics, namely that like particles are indistinguishable --- a concept which goes beyond mere identity of properties. This talk is about the history --- both scientific and personal --- of how this key concept arose, and about some of its repercussions in physics.

Wednesday, Nov 14th 2018

4:00 PM (Tea/Coffee at 3:30 PM)

Auditorium, TIFR-H
