

Colloquium

Curvature and Molding

Nitin Nitsure

TIFR, Mumbai

Various curved surfaces occur in nature and in human artifacts. What exactly is curvature? How to make curved things? The first part of this talk will explain the geometry of curvature in simple terms. The second part, based on joint work with Shankar Ghosh, will describe a new approach to mold plain plastic sheets into curved surfaces.

Friday, Oct 12th 2018

4:00 PM (Tea/Coffee at 3:30 PM)

Seminar Hall, TIFR-H
