Quantum Science and Technology, Ecosystem Progress - an Update

Reena Dayal (QETCI, Hyderabad)

21 Apr 2025 (Monday) | 16:00 Hrs (Tea / Coffee 15:45 Hrs) | Venue: TIFRH Auditorium

The world is divided on the state of the Quantum Science and Technology progress. There are some that call it a hype, others over emphasize the impact in the next 2 years.

What is the real progress that is happening not just on the research side, but also in terms of products that can actually be used, technology that can actually be leveraged? What is the state of the Quantum Ecosystem in India? What does it mean for job opportunities? If you have these questions, then this talk will be interesting to you.
